EXPERIMENTS ON PACKET CAPTURE TOOL:

WIRESHARK

AIM:

To study the Experiments on packet capture tool : Wire Shark

CAPTURING AND ANALYSING PACKETS USING WIRESHARK TOOL:

To filter, capture view packets in Wireshark Tool.

PROCEDURE:

- Select Local Area Connection in Wireshark
- Go to capture -> option
- Select stop capture automatically after 100 packets
- Then click Start capture
- Save the packets.

i) Create a Filter to display only TCP/UDP packets, inspect the packets and provide the flow graph.

PROCEDURE:

Select Local Area Connection in Wireshark.

Go to capture -> option

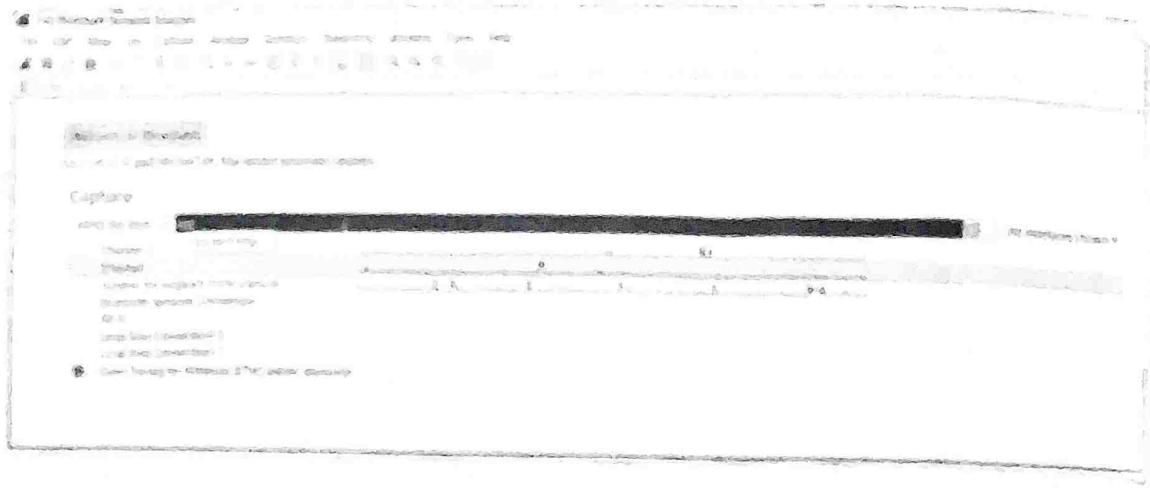

Select stop capture automatically after 100 packets.

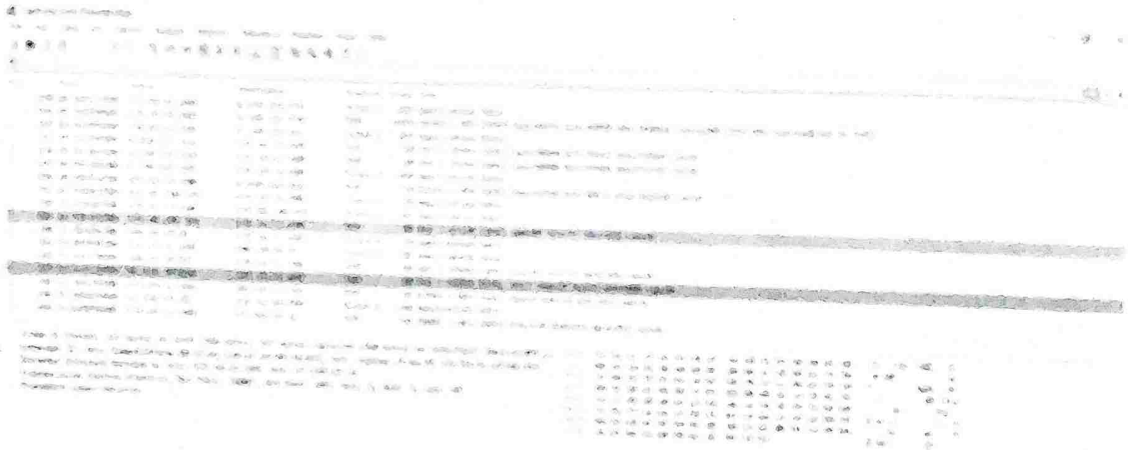

Then click Start capture

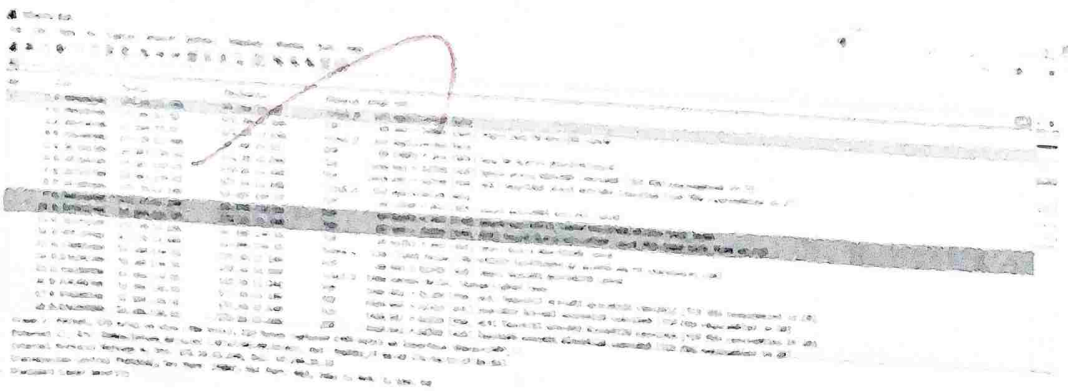

Search TCP packets in search bar.

To see flow graph click Statistics -> Flow graph

Save the packets.

2) Create a Filter to display only ARP packets and Inspect the packets

PROCEDURE :

- Go to capture -> option
- Select stop capture automatically after 100 packets.
- Then click Start capture.
- Search ARP packets in search bar
- Save the packets.

3) Create a Filter to display only DNS packets and provide the flow graph

PROCEDURE :

- Go to capture -> option
- Select stop capture automatically after 100 packets.
- Then click Start capture
- Search DNS packets in search bar.
- To see flow graph click Statistics -> Flow graph
- Save the packets.

4) Create a Filter to display only HTTP packets and Inspect the packets

PROCEDURE :

- Select Local Area Connection in Wireshark
- Go to capture -> option
- Select stop capture automatically after 100 packets.
- Then click Start capture.

* Search HTTP packets in search bar.
* Save the packets.

5) Create a Filter to display only IP/ICMP packets and Inspect the packets.

PROCEDURE:

* Select the Local Area Connection in WireShark
* Go to capture -> option
* Select stop capture automatically after 100 packets
* Then click Start capture and Save the packets.

6) Create a Filter to display only DHCP packets and Inspect the packets.

PROCEDURE:

* Select the Local Area Connection in WireShark
* Go to capture -> option
* Select stop capture automatically after 100 packets
* Then click Start capture & search DHCP packets
* Save the packets.

RESULT:

Thus, the Experiments on Packet capture tool Wiresharck has been implemented and verified successfully.
